

CORPORATE REPORTING

Triologue offers a full reporting service which includes a focus on authenticity and transparency. We support our clients in meeting the various regulatory codes and standards, whilst rising above any form of compliance-based reporting.

Specific corporate reporting services include:

Integrated reporting (including financial results), sustainability reporting and social impact reporting

A full range of services from concept design, information collection, writing, editing, proofing, design, photography to print management and delivery

Advisory support that advances lead practice before and through the reporting cycle, such as gap analysis and benchmarking, materiality and stakeholder engagement assessments (See Integrated Thinking Advisory service offering).

ABOUT TRIALOGUE

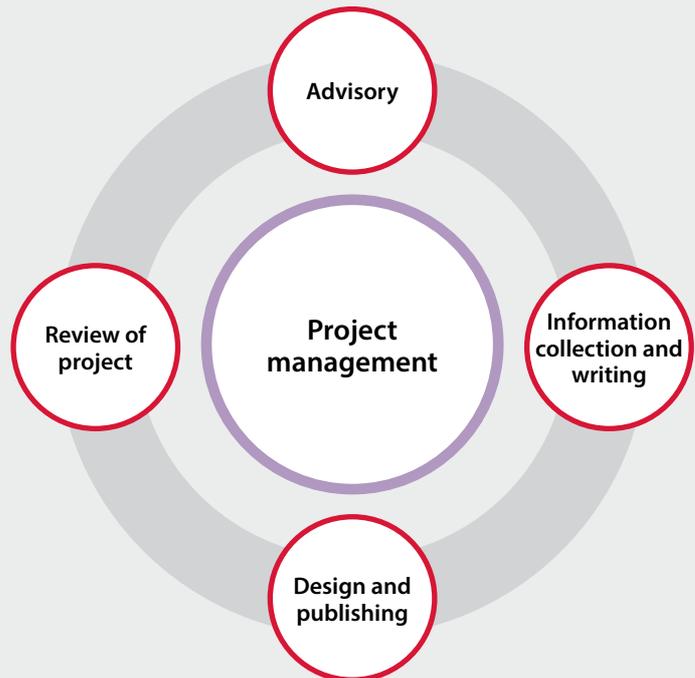

Triologue is one of only a few consultancies in South Africa that focuses exclusively on corporate responsibility issues. We are a 51% black-owned company with more than 20 years' experience in sustainability and corporate social investment (CSI). We are the South African partner of the CECF Global Exchange, a coalition that unites corporate societal engagement organisations from around the world to advance the corporate sector as a force for good.

OUR APPROACH

Our approach to reporting is hinged on a professional project management function. We lead with advisory support as a means of advancing lead practice through each reporting cycle. While this includes the standard gap analysis and benchmarking, we also support materiality and stakeholder engagement assessments to enable adherence to lead and recognised practice. Triologue has developed an Integrated Thinking Framework as part of our advisory service offering which provides valuable insights to the reporting process. This is explained in more detail in the sustainability consulting section.

We provide a tried-and-tested information collection and writing process that works in collaboration with our clients and our design agencies that we partner with to ensure completeness, accuracy and innovation. Our design agency partners have excellent credentials and capabilities in the reporting space. We work seamlessly between these agencies and our clients to ensure a smooth and professional project. Our design agencies are able to meet many requests from clients, including photography and website design.

Our experience stretches back to the early 2000's, when we assisted early adopters to sustainability reporting. Our experience in integrating reporting evolved as the space developed with the introduction of the International Integrated Reporting Council's <IR> Framework. We are a member of the Integrated Reporting Committee of South Africa, where we engage with peers on continuously improving the reporting framework.

Contact Matthew Le Cordeur (matthew@trialogue.co.za) for enquiries relating to your corporate reporting requirements.
